Allowable Subject Matter

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance: in a rotor for an automotive alternator comprising:

a pair of field cores each having a cylindrical base portion and a plurality of claw-shaped magnetic poles projecting from outer circumferential edges of the base portions, the field cores are secured to a rotating shaft facing each other in which end surfaces of the base portions are in close contact with each other and the claw-shaped magnetic poles intermesh with each other,

a cylindrical bobbin having a cylindrical portion and a pair of first and second annular flange portions projecting perpendicularly from both ends of the cylindrical portion, the bobbin being fitted over the base portions of the pair of field cores;

a field winding wound a predetermined number of turns into multiple layers on the cylindrical portion of the bobbin of the rotor; and

a recessed groove formed in an inner surface of the first annular flange portion from an outer circumferential end of the first annular flange portion to an inner circumferential end thereof,

in which the field winding has a substantially rectangular shape in which a pair of opposite flat surfaces are parallel,

the field winding is wound onto the cylindrical portion of the bobbin in which the pair of opposite flat surfaces face each other, relative to a radial direction of the cylindrical portion,

the bobbin is formed to have a held winding mounting anion in which length thereof is shorter than an axial length thereof,

the prior art's references of record do not disclose that a starting portion of the held winding is housed in the recessed groove so as to make the opposite flat surfaces square with an axis of the bobbin.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
